

Department of Human Resource Management Internal Service Fund Rates

Retirement and Independent Entities Interim Committee

Internal Service Funds:

ISF agencies employ business practices to take advantage of economies of scale, to avoid duplication of effort, and to provide an accounting mechanism to identify costs of certain governmental services. There are two primary advantages to using internal service funds within government.

- 1. ISFs charge customer agencies at rates set by the Legislature, and the price mechanism motivates customer agencies to find efficiencies to reduce expenses for ISF services so that operational budgets can be utilized elsewhere.
- 2. Agencies can use federal and restricted funds to pay for ISF services rather than relying solely on General Fund and Education Fund appropriations.

DHRM Rate Calculation Methodology

Historical Expenditures

- Look at expenditures for each rate separately.
- Trends / 1x costs

Future Changes

- SJR001 (2017 GS)
- Efficiencies and other needs

Retained Earnings

Adjust for retained earnings.

Estimated Expenditures

- Total estimated expenditures are divided by applicable FTE to come up with annual rate
- Rate is billed to agencies based on their FTE's
